34. Describe condition: The site is surrounded by marshy ground and residential development lies to the north, some of which was apparently built over the mine's historic surface plant features. The tunnel collapsed and drains water, which deposited gravel and sediments over flat ground, burying additional surface plant features. People left refuse on the waste rock dump in recent decades.

35. Vandalism: yes no describe: _____

36. National Register Eligibility Field Assessment:

Eligible Not Eligible Need Data

Statement of Significance/N.R.H.P. Justification: The site lacks integrity and is ineligible.

However, the waste rock dump is highly visible and is a prominent feature of the area's historic landscape.

37. Status in an Existing National Register District:

Contributing Non-Contributing

38. National Register District Potential yes no discuss: The site retains little integrity and is too isolated for district designation.
