

COLORADO CULTURAL RESOURCE INVENTORY

OAHP1404

Historic Architectural Component Form

Rev. 9/98

(page 1 of 2)

Use this form in conjunction with the *Management Data Form*. One of these forms should be completed for each building or structure. Include a photograph, sketch map, and a photocopy of the quad map showing building location.

I. IDENTIFICATION

1. Resource Number 5ST996 2. Temporary Resource Number: _____
3. Map ID Number / Feature Number or Code: Feature 4
4. Building or Structure Name: Privy
5. Complex/Site Name: Parkville Townsite
6. Photograph Number(s): _____

II. ARCHITECTURAL DESCRIPTION

7. Complex/Building/Structure Type: Shed
8. Architectural Style: Western Mining Vernacular
9. Building Support System: A vernacular 2x4 frame supports the walls, and the roof consists of planks nailed to the tops of the walls.
10. Dimensions: L 3½ x W 4 = Square Feet 14 Ft
11. Number of Stories: One
12. Building Plan (footprint, shape): Rectangular
13. Landscaping or Special Setting Features: The privy stands east of a collection of several building platforms.
14. Associated Buildings, Features, or Objects - Describe material and function (map number / name):
F.1: Building Platform; F.2: Building Platform; F.3: Building Platform; F.5: Building Platform

For the following categories include materials, techniques and styles in the description as appropriate:

15. Roof: The roof consists of planks clad with corrugated sheet iron, nailed to the tops of the walls.
16. Walls: The walls consist of corrugated sheet iron nailed to a vernacular 2x4 frame.
17. Foundation/Basement: The privy's 2x4 subframe lies on the ground.
18. Chimney(s): None
19. Windows: None
20. Doors: The west wall features a door, 30 inches wide and 78 inches high, made with planks.
21. Porches: None
22. General Architectural Description: The privy is a shed facing west. The front is 7 feet high and the rear is 6 feet high, and the structure is 3½ by 4 feet in area. The door, 30 inches wide and 78 inches high, was made with planks. The walls consist of corrugated sheet iron nailed to a vernacular 2x4 frame. The floor and bench consist of planks, and the bench features one port. The woodwork was assembled with wire nails. The pit manifests as a 55 gallon drum sunk into the underlying ground. Buried deposits are unlikely.

Resource Number: 5ST996
Temporary Resource Number: _____

Historic Architectural Component Form
(Page 2 of 2)

III. FUNCTION

23. Current Use: None
24. Original Use: Privy
25. Intermediate Use(s): Privy

IV. ARCHITECTURAL HISTORY

26. Architect: Unknown
27. Builder: Unknown
28. Date of construction: Actual _____ Assessor _____ Estimate 1930s-1950s
based on: The privy appears historic, and the 55 gallon drum that it stands over reflects a date during or after the 1930s, when such drums were manufactured.
29. Modifications: Minor _____ Moderate _____ Major _____ Moved _____ Date _____
Describe Modifications: None
Additions and Date: None
30. Associated Contexts and Historical Information: For a detailed description and interpretation of Swandyke, see the report on file at the OAHP *Mining the Golden Horseshoe: An Inventory of Select Historic Sites Around Breckenridge, Summit County, Colorado.*

V. OTHER RECORDING INFORMATION

31. Specific References to the Structure/Building: No
32. Archaeological Potential: Yes ___ No X Justify: A 55 gallon drum received wastes, and because it is not full, it contains little material.
33. Recorder(s): Eric Twitty
34. Date(s): August 30, 2003
